Yours Truly

For, Crestchem Limited

Khyati Vyas
Company Secretary

Breathing easy: Steps taken to boost Hussainsagar oxygen levels

Ahmedabad : Recent figures released by the Pollution Control Board (PCB) on Hussainsagar shows a favourable trend in recorded values of all water indicators. Of them, the most significant value of dissolved oxygen (DO) level was observed to be around 4mg/litre. As per the Central Pollution Control Board (CPCB), DO has been stabilised at the minimum required level of 4mg/litre — the level required for aquatic life to survive. DO levels at Hussainsagar have been stabilised by a process known as bioremediation. DO levels can decrease when a water body is

polluted with contaminants. Dissolved oxygen is essential for the survival of aquatic life. While DO level of 4mg/litre is the minimum to sustain aquatic life, levels of 7 to 8mg/litre are considered to be very good oxygen saturation levels for aquatic organisms. It may be noted that even at 4mg/litre, oxygen saturation will be above 70 per cent. In bioremediation, microbes like bacteria are used to reduce the foul smell and improve DO levels at the top layer of a water body. Across

various collection sites on Hussainsagar, DO readings were found to be at least 4mg/litre, indicating oxygen saturation levels of around 70 per cent. Bioremediation process was first introduced at the lake a few months ago when it was found that DO levels had dropped below the 4mg/litre threshold to sustain aquatic life. This is an advanced process which is already in use in developed countries. It was recently introduced in India with states such as Gujarat and Uttar Pradesh already utilizing the method, a member of the lake pollution control committee told. It must be mentioned that extremely high or extremely low DO levels can harm aquatic life and affect the quality of water too. While DO level of 4mg/litre is the minimum to sustain aquatic life, levels of 7 to 8mg/litre are considered to be very good oxygen saturation levels for aquatic organisms. It may be noted that even at 4mg/litre, oxygen saturation will be above 70 per cent.

Want to produce quality 'keepers for India: Pinal Shah

Ahmedabad : During his playing days Pinal Shah dreamt of keeping wickets for India. Though the former Baroda cricketer could not fulfil his dream, he wants to ensure that he produces quality wicketkeepers who would go on to play for India.

Shah, who recently hung his boots, has taken over as the chairman of the junior selection committee of Baroda Cricket Association (BCA). And, he has got down to business immediately. "We have a legacy of producing quality wicketkeepers from Baroda. Kiran More and Nayyar Mangia kept wickets for the Indian team for a long time and they contributed with the bat too. I want to revive that legacy and ensure that we produce quality wicketkeepers," Shah, who was a wicketkeeper-batsman, told TOI. He has also

captained the Baroda team. My job as a selector is to identify good cricketers and give them enough chances. It is important that talented players get opportunities to perform," Shah added. He was in talks with the BCA over the last couple of weeks after the manager offered him the job of junior selector.

Shah, who was a member of the U-19 World Cup squad, played 93 First Class games in his 16-year long career. He scored 3,409 runs including a double century. He took 278 catches behind the wicket and has 38 stumpings to his name. Shah has also played 54 T20 games and scored 471 runs. Impressed with his performance, Mumbai Indians team picked him up for the Indian Premier League (IPL) in 2008.

Truck driver, cleaner killed in accident

Ahmedabad : A truck turned turtle on Khajadia bypass road in Jamnagar early on Sunday morning, killing both the driver and the cleaner on the spot.

Police suspect that truck driver Prabhatsinh Vaghela (40) may have dozed off while driving. The truck was carrying iron rods and was heading towards the city. The accident occurred at around 5:30 AM. The driver and cleaner were both killed on the spot. The truck was carrying iron rods and was heading towards the city.

Dwarka, were stuck to the cabin. The duo was on their way to Hyderabad to deliver soda ash which they had loaded at Mithapur.

Insomnia? Mind your sleep hygiene

AHMEDABAD: If you have a hard time juggling with your sleep schedule, you may have tried everything under the moon to help you get that much-needed restorative sleep at night. You may be missing something — a sleep hygiene — that does not mean a good habit before you go to bed. A good sleep hygiene means having both a bedroom environment and daily routines that promote consistent, uninterrupted sleep. Recently, researchers at department of community medicine of BJ Medical College, Ahmedabad conducted a study on individuals as to whether they get their share of proper sleep. At least 27.9% respondents claimed that they very frequently do not get enough sleep, while 51.4% respondents had

felt sleepy and tired on at least 2 days in a week. Also 52.2% respondents said that they slept for 5-7 hours. But how did one put oneself to sleep. About 47.9% respondents claimed they read books, magazines in bed, while 78% said that they needed quiet to grab a nap. "About 47.9% respondents strongly agreed that sleep was very important to them and that it largely impacted their health and work lives," the study by senior resident doctor B Dhaval Parkesh, Vedant Dave and Tarek Shah claimed. The study also highlighted certain coping mechanisms to deal with sleeplessness. About 37.8% respondents said they avoided using bright screens and gadgets at least 2-3 hours before bedtime.

Surat tops 19 metro cities in filing chargesheet on time

LEADING THE PACK: Surat tops 19 metro cities in filing chargesheet on time. The city has the best track record in filing chargesheets in the stipulated time. According to the Crime in India 2020 report released by National Crime Record Bureau (NCRB), police filed chargesheet in 95.7% cases under Indian Penal Code (IPC). The city is followed by Gandhinagar with 95.6% and Gandhinagar with 95.3% respectively.

In December 2020, police filed a chargesheet in 15 days of offence registered in Gandhinagar police station. Police and courts in city are working to hold daily hearings in cases of serious nature like rape on minor girls. With two cities having the highest rate of filing chargesheet, Gujarat is on par with 97.1% rate followed by Kerala (94.9%) and Tamil Nadu (91.7%).

The data shows how active and vigilant police are. Police in the city work

with a target to file a chargesheet in a few days for serious crimes," said Nayyar Sukhadwal, district government leader, Surat district and sessions court. Police commissioner Ajay Tomar added, "It shows how much important police is giving to investigation and how efficiently we are carrying out our work." In the past one year, police have registered multiple cases under the Narcotic Drugs and Psychotropic Substances (NDPS) Act and Gujarat Control of Terrorism and Organized Crime (GUJCTOC) Act. Registering these cases was followed by filing chargesheet within the time limit. "Accuracy in police's work is the result of active supervision by officers of all ranks," Tomar added. According to the Crime in India 2020 report released by National Crime Record Bureau (NCRB), police filed chargesheet in 95.7% cases under Indian Penal Code (IPC). The city is followed by Gandhinagar with 95.6% and Gandhinagar with 95.3% respectively. In December 2020, police filed a chargesheet in 15 days of offence registered in Gandhinagar police station.
